RAILROAD

#### **ABOUT THIS REPORT**

Each December the Alaska Railroad (ARRC) issues its *Report to the State*, informing the Governor, Legislators and other key officials about our capital improvement plans. This report details our 5-year outlook on spending and capital investments in Alaska Railroad infrastructure.

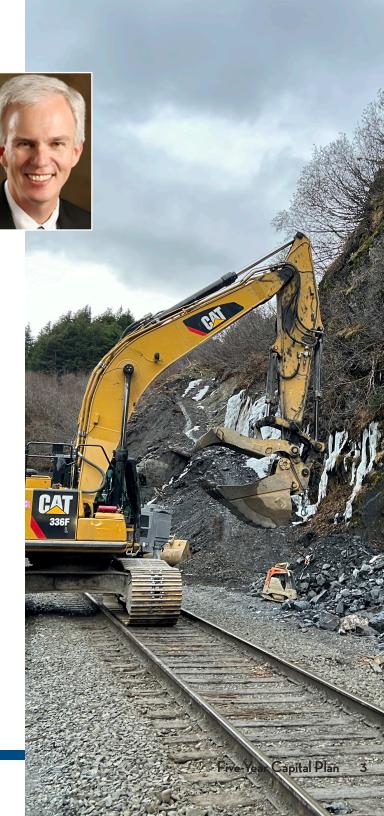

2023 marked the centennial year of the Alaska Railroad, and brought many opportunities for both celebration and reflection. From the founding of Alaska's largest city, to supporting critical projects such as the development of Prudhoe Bay and construction of the Trans-Alaska Pipeline, the Alaska Railroad has been a key driver of growth and progress in our state over the last century – a rich legacy we celebrated on July 15 in Nenana, commemorating the moment 100 years earlier when President Warren G. Harding drove in the golden spike to complete our main line.

As we look to our next 100 years, the Alaska Railroad will continue to play a vital role in Alaska's future. We've seen the impact of connecting our state's rich natural resources with steel tracks to ports, and the opportunities that increased transportation infrastructure can bring to small Alaskan communities. That's why we're continuing to pursue the advancement of two significant expansion projects, the Port MacKenzie Rail Extension and Northern Rail Extension. These are statewide economic development initiatives in both scope and benefit, and we look forward to working with partners across the state to find solutions to advance these key projects.

Finally, while our centennial is a wonderful milestone to celebrate, it also speaks to the age of some of our infrastructure. Our 5-year capital plan commits significant resources to bridge rehabilitation and track repair, as well as investments to support efficient rail transportation, enhanced marine terminal facilities and safe operating environments, as we remain committed to the maintenance and improvement of a healthy, self-sustaining Alaska Railroad to serve the people of Alaska into the next 100 years and beyond.
