Re: Alaska Railroad Corporation DBE Goal 2019-2021

Dear Mr. MacNeith:

The Alaska Railroad Corporation (ARRC) has updated its 2019-2021 Proposed DBE Goal Setting Evidence and Methodology document to reflect input received from DBEs and the public following an August 30, 2018 public meeting and comment period that ended September 7, 2018. The attached document updates the ARRC DBE goal package that we uploaded into TrAMS on August 1, 2018.

As you know, the ARRC’s overall goal for 2019-2021 is 3.0%. This goal is a race neutral goal and is posted on ARRC’s website.

If you have any questions regarding the ARRC’s goal or its calculations, please contact me at 907.265.2613 or at sellerswarehamt@akrr.com.

Very truly yours,

Tina Sellers Wareham
Deputy Chief Counsel
DBE Goal Setting Evidence and Methodology

I. Preface

In 2015, during the development of the Alaska Railroad Corporation (ARCC) Disadvantaged Business Enterprise (DBE) Goal for 2016-2018, several factors were impacting the number of capital projects ARCC could carry out, including FTA funding cuts, reduced freight revenues, and the need to apply FTA funds to bond debt service. With the enactment of the FAST Act, ARCC is back to prior FTA funding levels. ARCC continues to face challenges in its freight revenue mix, with fuel and coal lines of business still significantly below pre-2012 levels. ARCC projects it will use approximately one-third of the FTA funds it receives during the 2019-2021 timeframe to cover bond debt service for bonds issued to finance its FRA-mandated Positive Train Control (PTC) project and the corporation’s service of other debts. Though these challenges are not new, they continue to impact the allocation of FTA funds to capital projects.

In addition to the ongoing challenges posed by reduced revenues and bond debt service, ARCC is currently redirecting internal expense and capital dollars to comply with several new federally mandated requirements for PTC, safety, training and transit asset management (TAM). Because these mandates create a system-wide burden on our infrastructure spending obligations, ARCC’s current focus for its FTA fund allocation is on maintaining its system assets in a state of good repair.

II. Step No. 1 of the DBE Goal Calculation, 49 CFR § 26.45(c)

In Step No. 1 of the calculation, ARCC’s objective is to determine the relative availability of DBEs to perform the types of contracts (both prime and subcontracts) that ARCC intends to let during Federal Fiscal Years 2019-2021. Accordingly, the first area of inquiry for Step No. 1 is an examination of the FTA-funded projects ARCC currently plans for that time period:

<table>
<thead>

<td>1,041,735</td>
<td>Contractor</td>
</tr>
<tr>
<td>Seward Train Depot Communications Enhancements</td>
<td>99,360</td>
<td>Contractor</td>
</tr>
</tbody>
</table>
Breaking each of these project categories down into their potential for contracting opportunities, the results show:

**Preventive Maintenance.** From 2019-2021, ARRC anticipates receiving approximately $39,296,000 in Preventive Maintenance funds. Because ARRC receives these funds on a continuing basis, some of the funds are already dedicated to ongoing contracts. The remainder of the PM funds that ARRC reasonably anticipates awarding under contract are included in the goal methodology set forth below.

**Transit Asset Management.** Initially, ARRC will use these funds to engage a contractor to develop a TAM needs assessment, with the goal of identifying electronic solutions to support asset management data capture and analysis. Using the needs assessment, ARRC will develop an RFP to procure its asset management system. ARRC will select a software vendor and then enter a contract with the vendor to configure and implement the system. The TAM system is included in the methodology below.

**Track Rehabilitation Program.** ARRC performs the majority of its own track work using internal forces, but issues contracts for certain track rehabilitation services that require large pieces of specialized equipment that ARRC does not own and maintain itself. During the 2019-2021 timeframe, ARRC plans to expend FTA funds on rail grinding and ballast maintenance work. The rail grinding work will be performed under an ongoing contract. ARRC will be seeking to enter a contract for the ballast maintenance work, which is included in the goal methodology below.

**Passenger Car Rehabilitation Program.** As part of a multi-year project, ARRC will be using this money to rehabilitate numerous baggage, diner, café, and passenger cars. ARRC internal forces will perform a portion of the labor, and HVAC services will be provided under an ongoing term services contract. However, ARRC anticipates that the bulk of the work will be completed by contracting with flooring, exterior painting, interior surface, upholstery, plumbing, and mechanical contractors and suppliers. The various contracting opportunities afforded by this program are included in the goal methodology.

**Wheelchair Lift Replacement.** ARRC anticipates purchasing new wheelchair lifts during each of the years in the 2019-2021 timeframe. The lift replacement project is included in the goal methodology below.

**Dispatch Radio Modernization.** To maintain compatibility with existing systems, ARRC plans to modernize its radio dispatch operations by purchasing new system components from, and continuing its long association with, its current vendor. All labor for this project will be performed by ARRC internal forces. There are no contractable opportunities in this category.

**Seward Train Depot Communications Enhancements.** ARRC anticipates using these funds to enhance the network connection between the Seward communications shelter and ARRC’s Seward Depot. System design and engineering, permitting, and installation of the selected technology will be completed under ongoing term services contracts. Accordingly there are no contractable opportunities for DBEs on this project.
Methodology 1: Divide the number of DBEs in the market by the number of all businesses (DBE and non-DBE) in the market to derive a base figure for the relative availability of DBEs. Those calculations are broken down as follows:

<table>
<thead>
<tr>
<th>NAICS Code</th>

Combined Totals: 16 DBEs, 767 All Businesses, Relative Availability: 0.0209

---

1 ARRC obtained the appropriate NAICS codes from the NAICS Manual (2017), corporate filings, and direct communication with contractors. The number of DBE firms in those NAICS codes was derived from the State of Alaska AUCP’s DBE Directory, [http://www.dot.state.ak.us/cvlrts/directory.shtml](http://www.dot.state.ak.us/cvlrts/directory.shtml). The total number of businesses in the relevant market area bearing those NAICS codes was derived from the U.S. Census, [https://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml](https://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml).
Methodology 2: Use a bidders list from the previous year. Although ARRC has had projects similar to those listed above in previous years, it was determined that the bidders list for those projects may not adequately reflect the relative availability of DBEs in the market.

Methodology 3: Use information from a disparity study. At this time, ARRC does not have a disparity study.

Methodology 4: Use the goal of another recipient. The Alaska Department of Transportation & Public Facilities (DOT&PF) receives federal funding from FTA, the Federal Highway Administration, and the Federal Aviation Administration and sets DBE goals for each of those agencies. Because the ARRC’s projects for 2019-2021 are not significantly similar to DOT&PF’s FHWA projects (highway), its FAA projects (airport) or its FTA projects (bus and ferries), it was determined that this methodology should not be used as a determinative measure for arriving at a goal for the ARRC.

Methodology 5: Use alternative methods that appropriately reflect the relative availability of DBEs. No appropriate methods were found.

Having considered each of the methodologies set forth above, ARRC determined that the figure that best represents the overall base relative availability of DBEs for ARRC’s FTA-funded projects, before weighting, is 0.0216.

Weighting the Base Figure

Using the FTA’s Weighting Base Figure Worksheet, ARRC’s rounded, weighted base figure is 3%. A copy of the Weighting Base Figure Worksheet, including specific dollar amounts for projects by NAICS number, is attached to this DBE Goal submission.

III. Step Two of the DBE Goal Calculation, 49 CFR § 26.45(d)

Step 2 of the goal-setting procedure requires recipients to make adjustments, if necessary, to the base figure calculated in Step 1 above. Factors to be considered include: (1) the current capacity of DBEs to perform work on DOT-funded contracts as measured by the volume of work DBEs have performed in recent years; (2) evidence from disparity studies; (3) if using another recipient’s goal, adjustments required for differences in markets and contracting programs (this factor is inapplicable); (4) if available, evidence from related fields that affect opportunities for DBEs to form, grow and compete; (5) statistical disparities in the ability of DBEs to get financing, bonding and insurance; and (6) data on employment, self-employment, education, training, and union apprenticeship programs, to the extent that it is relevant to opportunities for DBEs to perform in the recipient’s program.

Having considered the Step 2 factors set forth in the regulations, ARRC finds that the factor most relevant to its program is historical data showing the work performed by DBEs on ARRC projects in the past three years and in 2018 to date. The use of this factor is justified by the fact that the contracting opportunities in 2019-2021 will be substantially similar to those experienced by the ARRC in past years. As reported previously in the ARRC’s Uniform Semiannual DBE Reports, the historical figures are:
IV. **ARRC Overall Goal Calculation FY 2019-2021**

   Step 1: Rounded Weighted Base Rate 3%
   
   Step 2: Mean Based on Historical Participation 0.48%
   
   Average Step 1 and Step 2: 1.74%

While the historical participation factor indicates that a downward adjustment of the overall goal may be appropriate, ARRC finds that the rounded weighted base rate, without adjustment, is consistent with its overall DBE goals in recent years. Accordingly, ARRC has elected to forgo any adjustment and will use the rounded, weighted base rate as its overall goal.

ARRC DBE Goal for FY 2019-2021 3%

V. **Division of Goal into Race Conscious and Race Neutral Means of Achievement, 49 CFR §§ 26.45(f)(3), 51(c)**

At the present time, the ARRC does not have a disparity study evidencing actual discrimination in federally-funded contracting opportunities against DBEs. Therefore, in accordance with 49 CFR § 26.45(f)(3), 49 CFR § 26.51(c), the FTA’s “Disadvantaged Business Enterprises; Western States Guidance for Public Transportation Providers,” 71 FR 14775 (March 23, 2006), and Western States Paving Co. v. United States Dept. of Transportation, 407 F.3d 983 (9th Cir. 2005), the ARRC maintains a fully race-neutral DBE Program.

VI. **Consultation and Publication, 49 CFR §26.45(g)(1)**

In February 2018, ARRC sponsored and participated in the annual two-day, statewide DBE conference hosted by the Alaska Department of Transportation & Public Facilities. This well-attended conference offers business development information to DBEs, and affords recipients and DBEs the opportunity to learn about each other’s projects and capabilities. ARRC participated in a panel discussion on how to do business with the corporation, provided procurement information to interested DBEs at ARRC’s staffed booth, and met one-on-one with numerous DBEs over a lengthy “match-making” session. Insofar as ARRC’s projects and contracting opportunities tend to be similar from year to year, ARRC found the interaction beneficial for informing its goal-setting process.
For further input on ARRC’s overall goal, ARRC conducted numerous outreach activities to obtain information relevant to the goal setting process, and to directly inform stakeholders of the additional efforts ARRC has undertaken to encourage public/DBE feedback:

- Published the proposed goal and methodology on ARRC’s website, accessible at www.alaskarailroad.com;
- Advertised the proposed goal in a statewide Public Notice format, a copy of which is attached to this document, providing for a public comment period extending a week beyond a public meeting to discuss the goal development process;
- Issued, via the Public Notice, a public meeting invitation and opportunity for in-person review of the overall goal and its rationale;
- Via individual emails, directly invited every certified DBE in Alaska to attend the public meeting, whether in person or through the call-in number provided;
- Published follow-up reminders of the public meeting on social media and on the corporate internal and public websites; and
- Emailed a reminder of the public meeting to all Alaska-certified DBEs the day before the meeting.

ARRC held the public meeting on August 30, 2018. With representatives present from all departments that participated in the goal-setting process, ARRC gave a presentation on its goal-setting methodology and spent the remainder of the time answering questions and engaging with the several DBEs in attendance. Along with questions regarding upcoming projects, ARRC received valuable feedback for incorporation into its final goal, as presented in this document. While the input did not ultimately change the calculation of proposed 3% overall goal, the meeting gave ARRC the opportunity, for example, to clarify the purpose of assigning NAICS codes to project tasks and to make DBEs aware of regularly published ARRC documents that identify upcoming projects years in advance.

During the next triennial DBE goal-setting effort in 2021, ARRC will host a similar meeting with stakeholders in June, prior to the August 1 due date.
Step 1 - Determine the weight of each type of work by NAICS Code:

* Enter all the FTA-assisted projects below. Project amounts should be assigned relevant NAICS Code(s).

<table>

The Alaska Railroad Corporation (ARRC) invites you to participate in its triennial Disadvantaged Business Enterprise (DBE) goal-setting process. ARRC is developing an overall DBE goal for use on projects funded by the Federal Transit Administration. For the period beginning October 1, 2018 to September 30, 2021 (FFY 2019-2021) ARRC proposes the following overall DBE goal: 3% (3% race-neutral, 0.00% race-conscious). You may find the goal methodology online at:

https://www.alaskarailroad.com/corporate/procurement/dbe-program

A public meeting to discuss the goal will be held:

**Thursday, August 30, 2018 from 10:00 a.m. until 11:00 a.m.**

Alaska Railroad Corporation  
James B. Blasingame Board Room  
327 West Ship Creek Avenue  
Anchorage, Alaska 99501

During the public comment period beginning July 31, 2018 and ending September 7, 2018, comments may be provided via:

Email: sellerswarehamt@akrr.com

Fax: 907.265.2443

Mail: Tina Sellers Wareham  
Alaska Railroad Corporation  
327 West Ship Creek Avenue  
Anchorage, Alaska 99501

Phone: (907) 265-2613

The proposed overall goal and its rationale are also available for review during normal business hours (8:00 a.m.-5:00 p.m., Monday-Friday) at the Alaska Railroad Corporation located at 327 West Ship Creek Avenue, Anchorage, Alaska 99501.

Individual with disabilities who may need auxiliary aids, services, and/or special modifications to participate in public meetings or who require special accommodations while gathering information on this file, should contact Tina Wareham at 907.265.2613 or email at sellerswarehamt@akrr.com; TDD number 907.265.2621; requests should be made at least two days before the accommodation is needed to make any necessary arrangements.
