Bridge MP 370.7 Pier Replacement Project
Comment:
A 100-ft section of trainman walk will be removed prior to drilled shaft construction activities in March 2018. Temporary construction with guardrail will be provided as a temporary access point to north section of the existing trainman walk. Trainman walk will be restored in June 2018.

Area of Work:
New Drilled Shaft Foundation

Temp. Pedestrian Access

Route #1 - Temp. Pedestrian Access
Route #2 - Temp. Pedestrian Access

Temp. Const. Stairs

Temp. Pedestrian Access Barrier

Temp. Pedestrian Access Route
Route #1 - Utilized during drilled shaft construction work on west trestle
Route #2 - Utilized during drilled construction work on east trestle

Only one temporary pedestrian access route will be "open" at a time during construction and will be clearly identified.
