Drift Control

DEPOSITION AID AND DRIFT RETARDANT

ACTIVE INGREDIENTS:
Polyvinyl Polymer (Polyacrylamide) .......................................................... 35.25%
Inert Ingredients ......................................................................................... 64.75%

TOTAL  ........................................................................................................ 100%

All ingredients are exempt from tolerance requirements as specified in federal regulation 40 CFR 180.

CA REG NO.: 526467-50015-AA

KEEP OUT OF REACH OF CHILDREN

CAUTION

Precautionary Statements
Hazards to humans and domestic animals.
Causes skin and moderate eye irritation. Do not get in eyes, on skin or clothing. Harmful if absorbed through skin.

DISTRIBUTED BY: Alligare, LLC
13 N. 8th Street, Opelika, AL 36801

SN: 04303-051111

GENERAL INFORMATION

ALLIGARE DRIFT CONTROL is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying operations. ALLIGARE DRIFT CONTROL is designed for general use in standard ground and aerial applications and is fully compatible with a wide variety of spray configurations including those with new A.I. and other specialized drift reduction nozzles. Further, ALLIGARE DRIFT CONTROL is compatible in tank mix application with a broad spectrum of crop protection pesticides, including the complete range of all branded and generic glyphosate formulations.

DIRECTIONS FOR USE

Dosages may be adjusted to compensate for environmental conditions or mechanical factors. Lower dosages may be used when spraying under calm winds, slow application speeds, low pressures, and lower boom heights with nozzles closer to the target. The greater the shear on the spray boom nozzle head, the greater the spray droplet fragmentation, which produces fines (mists) that may drift to non-targeted areas or evaporate. For best results in aerial application, use state-of-the-art techniques, such as pressure less than 45 psi and nozzles oriented 45 degrees back to straight back.

MIXING

ALLIGARE DRIFT CONTROL is very concentrated and performs effectively at ultra-low use rates even as low as 1-4 oz. per 100 gal. of water. Start with low dosage rates and increase as needed. A thickened or "stringy" solution indicates, that too much ALLIGARE DRIFT CONTROL has been used.

Step 1. Select proper dosage for the spraying operation. Step 2. Fill mix tank with water, pesticide, fertilizer, surfactant/ additives and adjuvates. Step 3. Shake bottle well before using. Step 4. For best mixing results, either (1) inject ALLIGARE DRIFT CONTROL liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add ALLIGARE DRIFT CONTROL liquid to the agitating tank mix at the area of highest turbulence. Step 5. Continue to agitate mix tank for at least 3 minutes before spraying. Step 6. Follow all cleanup precautions on label of pesticide used. Follow governmental procedures for disposal of pesticide spray solution.

DOSAGE CHART

<table>
<thead>
<tr>
<th>Spray Pressure</th>
<th>Nozzle Orientation</th>
<th>ALLIGARE DRIFT CONTROL DOSAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aerial applied below 45 psi</td>
<td>Straight Back</td>
<td>2 - 6 oz. / 100 gals.</td>
</tr>
<tr>
<td></td>
<td>45° Angle Back</td>
<td>4 - 8 oz. / 100 gals.</td>
</tr>
<tr>
<td>Ground Application</td>
<td>Off-Center</td>
<td>3 - 5 oz. / 100 gals.</td>
</tr>
<tr>
<td>Low (below 30 psi)</td>
<td>Flat Fan, Flooding</td>
<td>1 - 4 oz. / 100 gals.</td>
</tr>
<tr>
<td></td>
<td>Off-Center</td>
<td>3 - 4 oz. / 100 gals.</td>
</tr>
<tr>
<td>Medium (30 - 50 psi)</td>
<td>Flat Fan, Flooding</td>
<td>4 - 6 oz. / 100 gals.</td>
</tr>
<tr>
<td></td>
<td>Off-Center</td>
<td>4 - 6 oz. / 100 gals.</td>
</tr>
<tr>
<td>High (over 50 psi)</td>
<td>Spray Guns</td>
<td>5 - 8 oz. / 100 gals.</td>
</tr>
<tr>
<td></td>
<td>Spray Guns</td>
<td>8 - 32 oz. / 100 gals.</td>
</tr>
</tbody>
</table>

Higher spray pressure or greater agitation requires higher rates to maintain good drift control. If unacceptable drift is still occurring, add additional ALLIGARE DRIFT CONTROL in increments of 1 oz. per 100 gal. of spray solution.

STORAGE AND DISPOSAL

PROTECT FROM FREEZING. Store in cool dry place at temperatures between 45 °F and 90 °F. Keep in original container tightly closed. To avoid product degradation and equipment corrosion, do not use iron, copper or aluminum containers or equipment.

CONTAINER DISPOSAL: Do not reuse empty container. When empty, resell container and offer for recycling, reconditioning or disposal in approved landfill.

WARRANTY: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
