TRAFFIC CONTROL PLAN

- Utilize half-width construction and one lane road as needed with appropriate paving, markings, traffic control devices, channelization, and active work area barricades in accordance with the latest state and AASHTO traffic manual.
- Utilize temporary signalization for half-width/lane lane road.
- Provide coordination access for vehicles to the board room and 49th state station.
- Provide continued access for your buses to the active railroad operations area, coordinate with ASDC for anticipated times and dates for your buses.
- Maintain 25' of clear space between railroad tracks and active station house.
