January 28, 2020

Addendum 2
Invitation to Bid # 20-01-207635
Whittier Corrosion Inspection and Repairs

Addendum number 2 is issued for Questions and Extension of time.

The Closing Date for this ITB has changed.
Bids will be received until Thursday February 6, 2020 @ 3:00 PM Alaska time.

Questions:

1. We have been unable to find the lead test results in the ITB. Can these be provided as different concentrations require different mitigation methods?
   a. See attachment: “Lead Paint Analysis-06152017.pdf”

2. Appendix F shows the completion date as May 1, 2020. Knowing the weather in Whittier and the restrictions for the lead abatement/metalizing work can cause significant delays particularly if it's a late spring. Can this date be extended, at least for the metalizing portion of the work?
   a. Contract extensions for the reasons listed in subsection 108-1.06.3 “Reasons for Suspension of Work and Extension of Contract Time” will be reviewed on a case-by-case basis. Substantial and final completion dates are likely to be extended to ensure that the coating is applied in accordance with the specifications.

3. Can the photos discussed at the site walk be provided?
   a. They will be uploaded to a dropbox site and the link will be emailed out to those who request it.

All other terms and conditions remain unchanged.
If there are any questions regarding this addendum please let me know.

Thank you,

Greg C Goemer
Sr. Contract Administrator
Alaska Railroad Corporation

Preparation is performed according to EPA Method SW-846 3050B (M). Analysis performed according to EPA method SW-846 7420 (M), analysis by flame atomic absorption spectroscopy. The Reporting Limit is at least twice that of the Method Detection Limit (MDL). The MDL (defined as the minimum concentration of an analyte that can be reported with 99% confidence to have a concentration greater than zero) is determined from statistical analysis of replicate samples in a given matrix containing the analyte, as defined in 40CFR Part 136, Appendix B. Field and laboratory blanks are used to assess possible contamination and sensitivity of analysis, and no blank correction is made. Unless otherwise stated, all quality control samples are acceptable. Modifications made to the previously referenced test methods are documented in WEC, Inc. Standard Operating Procedures Manual. Supporting laboratory documentation is available upon request. Unless otherwise stated, samples are received in acceptable condition. Results relate only to the items tested. WEC, Inc. Anchorage is a current proficient participant in the AIHA ELPAT program and is accredited by AIHA LAP², LLC for environmental lead (Lab ID# 102739). Test reports must not be reproduced without the approval of WEC, Inc. and are subject to WEC, Inc. General Terms and Conditions (available upon request).
CHAIN OF CUSTODY

Date: 6/26/17

Customer Name: Alaska Clean (and) Corporation

Project Name: Whitter Barge Slip

Billing Address: 327 W Ship Creek

City: Anchorage

State: AK

Zip Code: 99501

Phone: (907) 265-2455

Cell: (907) 748-2196

Send report via (choose one): Email: WHITE@WECNW.COM or Fax: (907) 265-2751

**Only for SAME DAY T.A.T.** Verbal (circle one) Y / N If yes, please provide name/contact #:

**By signing for these samples you are responsible for payment. We will not bill someone else on your behalf.**

It is the responsibility of the Customer to ensure that samples are correctly taken and packaged. WEC reserves the right to refuse samples for analysis which are obviously unsuitable due to damage, incorrect or insufficient labelling, or incorrect sample loading. WEC will contact the Customer as soon as such a problem is identified and will discuss with the Customer the course of action to be taken.
